<ul style="list-style-type: none">University StudentApplying for Starter IT roles	<ul style="list-style-type: none">Graduate with high resultsHave 1 to 2 years' experience in the entry level role	<ul style="list-style-type: none">Applying for entry pentesting jobs while gaining experience/qualifications	<ul style="list-style-type: none">Working as a high-level penetration tester

Personal SWOT Analysis

Strengths	Weaknesses
<ul style="list-style-type: none">Problem solving skillsAnalyticalSelf-ReliantResourceful	<ul style="list-style-type: none">Non-creativeStubborn
Opportunities	Threats
<ul style="list-style-type: none">Cybersecurity in high demandThrough university can gain contacts in IT industry	<ul style="list-style-type: none">Automated out of jobIndustry changes quickly

Detailed Plan

According to (Indeed, 2021) There is 5 steps to becoming a penetration tester.

Step 1 – Earn a high school diploma (I have this)

Step 2 – Obtain a bachelor's degree in a related field (I am currently working toward this)

Step 3 – Gain Experience with an entry level position (currently job searching for this)

Step 4 – Earn professional certifications according to (Novinson and Novinson, 2020) some of the top cybersecurity qualifications that will help (NOTE: not all of these are required to get the job just help stand out when applying) gain employment include:

- Certified Information Security Systems Professional (CISSP)
- AWS Certified Security – Specialty
- Certified Cloud Security Professional (CCSP)
- ISACA Certifications – CISA, CISM and CRISC
- OT Security Certifications
- Palo Alto Networks – PCNSE and PCNSE
- Systems Security Certified Practitioner (SSCP)
- Certified Ethical Hacker (CEH) (Important for me specifically)
- SANS Institute Certifications (Important for me specifically)
- Cisco Identity Services Engine (ISE)
- AV – Test and MRG Effitas (Understanding Malware)

Step 5 – Join peer groups (Will try to do this throughout university and my career)

My Career Path

Current	1-3 Year Target	3-5 Year Target	End Goal
<ul style="list-style-type: none"> University Student Develop basic web pages and applications on GitHub for experience 	<ul style="list-style-type: none"> Graduate with high results Work towards industry certifications such as cisco, salesforce etc. Start to monetise basic web pages and applications online 	<ul style="list-style-type: none"> Apply for formal entry level and junior front-end jobs whilst gaining further experience and qualifications 	<ul style="list-style-type: none"> Working as a Senior Front-End Software Engineer

Personal SWOT Analysis

Strengths	Weaknesses
<ul style="list-style-type: none"> Analytical Organized Independent/ Take Initiative Problem Solving Skills 	<ul style="list-style-type: none"> Tendency to rush Self-Critical
Opportunities	Threats
<ul style="list-style-type: none"> Front-End Development is in high demand Contacts with peers at university who may later become colleagues Internships with large companies who have graduate programmes 	<ul style="list-style-type: none"> Keeping up with ever changing industry (you will need to be prepared for lifelong learning) Automation of jobs could be a potential threat in future Physical toll of long hours sitting could be damaging to health if you don't have balance.

Detailed Plan

According to Indeed, there are 6 steps to becoming a Front-End Developer

- Step 1- Obtain an education (I am in the process of doing this)
- Step 2 – Advance your technical skills (This will be something I start doing at university and continue throughout my career)
- Step 3 – Practice coding (This is something that I started before my degree and will continue throughout my education and career)
- Step 4 – Interact with the web development community. (This is something I can do whilst studying, as well as when working.)
- Step 5 – Develop an online portfolio (This is something that I have started working on at the commencement of this degree through GitHub.) Some useful certifications include,
 - Certified Scrum Master (CSM)
 - Google Data Analytics Professional Certificate
 - Java Development Certified Professional
 - Salesforce Certification
- Step 6 – Find the right web development job for you. (It will be important to keep looking for work that is enhancing my skills and challenging me.)

Name: Michail Christofis
My Career Path

Current	1-3 Year Target	3-5 Year Target	End Goal
<ul style="list-style-type: none"> University student Work part time as a mathematics tutor Looking for a part time job in IT 	<ul style="list-style-type: none"> Have multiple years of experience working in the field of IT In 3 years have my bachelor's degree in IT finished with good results. Have completed multiple extracurricular activities, which will increase my value in the eyes of a potential employer. 	<ul style="list-style-type: none"> Start and complete a master's degree in a relevant subject. Have all the qualifications required to be accepted at an ideal, for me, job. Be an experienced software developer. 	<ul style="list-style-type: none"> Work as a high-end software developer

Personal SWOT Analysis

Strengths	Weaknesses
<ul style="list-style-type: none"> Problem solving skills Out of the box thinking Extreme work ethic Resourceful Good team player Reliable 	<ul style="list-style-type: none"> I trust people very easily. I am an eternal optimist.
Opportunities	Threats
<ul style="list-style-type: none"> Software developers are in high demand. University can grant access to numerous contacts, which might be needed in the future. In the field of IT, you don't need to work onsite, hence opening up a plethora of off-site working opportunities. 	<ul style="list-style-type: none"> Development of highly sophisticated AI which can write programs on its own. Sudden influx of highly skilled IT professionals. A collapse of the markets, due to a cataclysmic event (WW3, pandemic, etc.).

Detailed Plan

- Get a bachelor's degree in IT, with high results.
- Get a master's degree in a relevant subject, with high results.
- Simultaneously start getting work experience at an IT company.
- Do extracurricular activities, so as to expand my field of knowledge and my horizons in general, hence making me a more valuable asset to a potential employer.
- Learn how to program in all relevant languages.
- Gain contacts in the world of IT.
- Once I have completed my master's degree, I will attempt to become an integral part of an IT company and grow with it.

Soft Skill Development
